

COR-557BB

INDOOR / OUTDOOR BACK BOX BRACKET FOR COR-557 SERIES DOMES

Metal Ceiling/Wall Back Box

The COR-557BB back box bracket is designed specifically for COR-557 series dome security cameras. The COR-557BB provides a secure mounting point with a protected space directly beneath the dome camera where video and power cable connections can be made.

General Specifications

Construction: metal (zinc-alloy) with baked finish

Dimensions:

Camera Side: 6 1/2" across

Wall/Ceiling Mount Side: 5 7/8" across

Depth: 1 7/8" (outside)

Indoor/outdoor

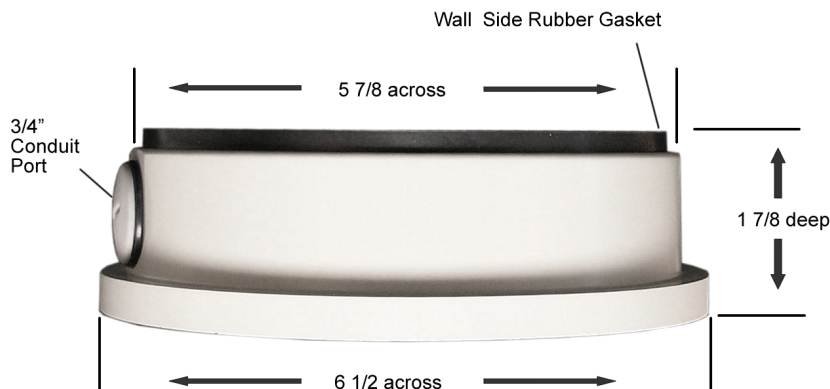

Notes: Designed for permanent mount.

Package Contents

Installation Kit, Installation instructions, hardware, maintenance tools and gasketed conduit port plugs.

Since the wall or ceiling (the mounting point) only needs to be penetrated once, camera modifications that require removal and re-attachment of the camera (replacement or maintenance) will not effect or damage the wall. If you've ever had to repeatedly mount any item on a concrete, wood or drywall surface, you'll quickly appreciate the strong and dependable surface provided by the metal backbox. Its threaded screw holes mate perfectly with the hole-pattern of the 557-series dome camera.
